Art Unit: 1627

Claims 1-31 are currently pending in this application.

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-27 and 31, drawn to a method for identifying a cellular component to which a small molecule is capable of binding and a kit for detecting interactions between pharmacologically relevant small molecules, classified in class 435, subclass 6.
 - II. Claim 28, drawn to a method of identifying a small molecule capable of binding a molecular target, classified in class 435, subclass 6.
 - III. Claims 29-30, drawn to a method of identifying a small molecule capable of competitively binding a molecular target in presence of a known binding ligand, classified in class 435, subclass 6.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of groups I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of groups I-III are drawn to different methods of identifying molecules which differ by the method steps and reagents used, the group I inventions are drawn to a method for identifying a target which binds to a cellular component and a kit for detecting interactions between pharmacologically relevant small molecules; group II inventions are drawn to a method of identifying a small molecule which binds to a biologically active molecules, which

Art Unit: 1627

method uses a library of hybrid molecules; and the group III inventions are drawn to a method of identifying a small molecule capable of competitively binding a target in presence of a known binding ligand.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
6. Applicant is required to reply to this restriction requirement within 30 days of mailing this action. See MPEP 809.2(a).

Any inquiry concerning this communication should be directed to P. Ponnaluri whose telephone number is (703) 305-3884. The examiner can normally be reached on Monday through Friday from 8:00 am to 4:30 pm.
